

Faster. Safer. More Efficient.

Reduce labor costs, improve safety, and increase efficiency with duct bank and bore spacers from Professional Plastics. Get out of the ground faster and spend less time on the jobsite! These underground spacers can be safely assembled and installed up to 10 times faster than chair spacers, limiting the number of man hours needed to complete a project.

Advantages - Build a More Stable Duct Bank

- Easy, low cost assembly - up to 10 times faster than chairs
- Reduce labor costs
- Improved installation times - safe & quick installation
- Maximizes the use of space within the trench
- Direct sourced material - HDPE - 3/8" and 1/2" thick
- Fast jobsite delivery
- Nationwide shipping from our 21 U.S. locations
- Made in the USA
