Hygard® BR1000 sheet

Ballistic glazing - Level 2

Hygard® BR1000 ballistic grade sheet is a 1.000˝, 4-ply polycarbonate laminate that meets the UL 752 Level 2 rating for .357 Magnum ballistic attack and HP White TP 0500 Level IV. Unlike glass-clad products, this all-polycarbonate laminate resists spalling and white-out after repeated high force and ballistic impacts, an advantage in maintaining visibility of a threat during an attack. All Hygard products incorporate Makrolon® polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary Makrolon AR hardcoat that facilitates cleaning and resists marring, chemical attack, and graffiti. Hygard BR1000 sheet has a seven (7) year Limited Product Warranty against coating failure, yellowing, and hazing. The terms of the warranty are available upon request.

Glazing recommendations
• Structural security framing systems with equal or greater forced entry and/or ballistics ratings as the selected Hygard laminate are recommended
• Hygard laminate should be cut to allow for a minimum of one (1) inch edge engagement in the frame, with sufficient rabbet depth for material expansion (approx. 1/16˝/ft.)
• Use wet or dry sealants/gaskets that are compatible with polycarbonate
• Remove protective masking after glazing operations are completed and before prolonged exposure to direct sunlight, moisture, or high temperature
