Glazing recommendations
• Structural security framing systems with equal or greater forced entry and/or ballistics ratings as the selected Hygard laminate are recommended
• Hygard MS1250 must be installed with acrylic ply facing the ballistic attack side
• Hygard laminate should be cut to allow for a minimum of one (1) inch edge engagement in the frame, with sufficient rabbet depth for material expansion (approx. 1/16˝/ft.)
• Use wet or dry sealants/gaskets that are compatible with polycarbonate
• Remove protective masking after glazing operations are completed and before prolonged exposure to direct sunlight, moisture, or high temperature
