

Perforated PVC and Polypropylene Plastic Sheet (standard 48" x 96" sheets)

Professional Plastics offers 23 standard plastic perforated sheets including both dark gray PVC and natural color polypropylene plastic items. Stock sheets range from 1/16" to 1/4" thick, and come in configurations ranging from 10% open air to 48% open air. Perforated Plastic is ideally suited to many of the same applications as perforated metal; however, it is lighter and is more corrosive resistant. Consider plastic on your next perforated project

	<p>3/32" diameter 3/16" staggered centers 32 holes per sq. inch 25% open area 1/8" thick</p>		<p>1/4" diameter 1/2" straight line centers 4 holes per sq. inch 20% open area 1/8" & 1/4" thick</p>
