## HDPE

This superior HDPE material can be used indoors or outdoors, it is ideal for wood or metal replacement applications. The materials are lead and heavy metal free, which allows them to optimize performance while being environmentally friendly. It is ideal for outdoor cabinetry, POP displays, signage and more.

### Top Applications:

- Indoor / outdoor cabinetry
- Furniture
- Point of purchase displays
- Signage
- Metal and wood replacements

### Key Material Benefits:

- Easy to fabricate
- Weatherability (UV stabilized)
- Excellent scratch resistance
- Will not delaminate, chip, rot, or swell
- No moisture absorption
- Great impact and stiffness

### Competitive Advantages:

- Designer color and textures

- Only HDPE material available in the marketplace
- Maintenance free
- Will not rust
- Never needs painting

### Compliances:

- RoHS compliant
